I'm energetic and enthusiastic about learning new web technologies. This enthusiasm made me sign up for multiple web dev internships and finish personal projects. I have experience in client dealings, UI/UX design, web app development, debugging and testing, database management, and project management.

WORK EXPERIENCE

Software Engineer
EV Software Solution Private Limited

12/2022 - Present   *Noida*

As a seasoned Software Engineer, I specialize in the seamless development of scalable and robust systems tailored to client requirements. Leveraging Agile lifecycle methodologies, I adeptly drive efficient project development and delivery, ensuring alignment with client goals and timelines. Additionally, I play a pivotal role in AWS infrastructure design, optimizing system performance and reliability. Committed to collaborative teamwork, I thrive in dynamic environments, contributing to the success of cross-functional projects with precision and professionalism.

Full Stack Developer
KUBE Retail Tech

11/2021 - 09/2020   *Noida*

As a key team player in a startup environment, I spearheaded the development of a hyper-local Information Marketplace from scratch. Leading the system and database design efforts, I ensured a scalable and modular web platform. Collaborating closely with cross-functional teams, I delivered an excellent product, emphasizing teamwork and innovation.

EDUCATION

B.Tech
Guru Gobind Singh Indraprastha University

08/2018 - 06/2022   *82%*

Courses
- Bachelor of Technology in Information Technology

INTERESTS

Trekking   Travelling

Bike Riding   Business Analysis

SKILLS

Node.Js	TypeScript
Express	JavaScript
React	AWS
C++	Lambda
OOPs	PostgreSQL
Data Structure	MongoDB

PROJECTS

Cainz - Marketplace panel for seller and admin (12/2022 - Present)
- Spearheaded the creation of a cutting-edge Marketplace Panel for Cainz, integrating seamless interactions between sellers and administrators, resulting in optimized operational efficiency and enhanced user experience.
- Engineered APIs tailored to the unique needs of the Admin Dashboard, empowering administrators with intuitive features for efficient management of multiple sellers within the marketplace ecosystem.
- Innovated Seller Dashboard APIs, equipping sellers with powerful tools to effortlessly manage exhibitors, stores, and products, and execute bulk upload services, enhancing productivity and market presence.
- Pioneered the design and implementation of a robust Serverless Architecture utilizing Lambda AWS, ensuring scalability, cost-effectiveness, and high performance.
- Orchestrated the development and maintenance of comprehensive Low-Level Designs (LLD) for backend services, facilitating clear understanding and streamlined execution of project objectives.
- Demonstrated adeptness in managing and deploying all services on the AWS infrastructure, guaranteeing seamless integration and reliable performance across the platform.

KUBE Retail Tech (11/2021 - 09/2022)
- Orchestrated website planning and system design architecture, optimizing functionality and user experience.
- Directed the web development process, collaborating with cross-functional teams to ensure timely project delivery.
- Spearheaded full-stack development tasks, leveraging technologies such as MongoDB, Express, React, and Node.js.
- managed server infrastructure, ensuring optimal performance and reliability
